Starting from the observation that, at the end of the 1980s, Italy and Germany faced similar challenges related to the long-term financial sustainability of their respective pension system, this study highlights the social implications of the reform strategy adopted in each country. More precisely, the issue of pension reform is approached from a distributive angle, building on the work of both Camila Arza on the new distributional principles of contemporary pension policies and of John Myles on the issue of intergenerational fairness with respect to old-age social security reform. The Italian and German pension reform trajectories are dealt with in separate chapters, focusing on...
