Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

(Mitchell Kuhn III)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Original publisher: Portland, Or. : Northwest Power and Conservation Council, 2007. OCLC Number: (OCoLC)212845627 Subject: Fisheries -- Columbia River Watershed -- Evaluation. Excerpt: . . . ISRP and IEAB SAFE Review 2007 ISRP Conclusions The select area fisheries project appears successful, providing high and relatively stable harvest rates with minimal impacts on non-target and listed stocks, especially those above Bonneville Dam. The project is consistent with the Northwest Power and Conservation Councils Fish and Wildlife Program and the Bi-State Lower Columbia River and Columbia River Estuary Subbasin Plan. Survival rates of SAFE fish are generally about equal to or better than those achieved at lower Columbia River hatcheries. Harvest of SAFE fish makes up a significant component of the lower Columbia River catch of salmon. Adaptive management has been a key component of the project. The fishery has been carefully monitored to assess catch and effects on non-target stocks and regulations have been adjusted when deleterious impacts have been observed or anticipated. For example, the use of juvenile rearing and smolt release sites has been discontinued or release facilities have been relocated to lower stray rates while maintaining production. At times, the fishing season has been altered or the SAFE fishery has been closed to minimize effects on non-target stocks. Although the impacts of the fishery on listed stocks appear small at this time, it is critical that rigorous monitoring and evaluation of the fishery continue, especially as the fishery expands. Some concerns about the report remain. Discussion of methods in the report could have been more comprehensive and complete, and statistical analysis of the coded wire tag and experimental study data was entirely lacking. The report does not present convincing evidence that there is opportunity...
