ARTIFICIAL LIGHT AND ITS APPLICATION IN THE HOME (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Artificial Light and Its Application in the Home The aim of this book is to present a practical, concise, and reliable treatment of artificial lighting and its application in the home. It is hoped that this textbook, which contains the fundamental concepts and the practical interpretations and applications of light in the home, may satisfy the demands for information on the part of colleges, universities, normal schools, and other places where instruction is centered on training in the various phases of house planning and home economics. Since the printed sources of home-lighting information have been scattered, difficult to locate, and not especially prepared for this apparent need, the Illuminating Engineering Society undertook the preparation of this book. Although it is designed primarily as a textbook, it is hoped that, because of its simple, non-technical style, it may prove a suitable source of information to the home keeper herself, who is more and more interested in the best methods of utilizing artificial light in the home. This book has been prepared by specialists who have devoted either all or a large part of their time and efforts to the development of the art of home lighting, and, accordingly, this compilation includes the underlying fundamentals and practices gained from their researches, observations and experiences.
