Sir John Rennie also recommended the formation of reservoirs, with overfalls and weirs to receive the sand and mud brought down from the upper part of the country, and thus prevent its accumulation in the river. 65. Fig. 15 will give a general idea of an arrange Fig. 15. ment of drains, which will be suitable for a level district with high land behind it. In this Fig. A B is the river, and c D the high land, E F G represent a catch-water drain for receiving the waters from the high land. H u, a parallel main drain for the level, with another main drain i K. Between the main drains the level is intersected with minor drains, which have a fall either way towards the mains. The catch-water drain is adapted to discharge directly into the river, or by closed sluices at...

Reviews

The publication is fantastic and great. It really is basic but shocks from the 50 percent from the ebook. Its been written in an remarkably easy way in fact it is only soon after i finished reading this ebook in which really changed me, alter the way in my opinion.
