HDR interface and the experimenters end-equipment from the continuousmode (non-TDMA) modem operation and a built-in NMT operator interface. The operator interface provided nu-RF calibration signal for link calibration and testing. The merous statistics on the state of the link including coded and continuous modem operation would have been valuable for uncoded BER, number of unique words sent and received, station characterization and debugging and provided a more number of correctable and uncorrectable errors, but only basic robust link for a point-to-point connection when the TDMA SONET status (i. e. , loss of link, loss of pointer, etc.) informa-network overhead was unnecessary. Also, an additional dial-up tion. Toward the end of the program, particularly when using capability to enable PPP (point-to-point protocol) connections the OC - 12...
