Designing Intelligence

By Josh Bongard

GRIN Verlag. Paperback. Book Condition: New. Paperback. 114 pages. Dimensions: 8.3in. x 5.9in. x 0.6in.Anthology from the year 2011 in the subject Sociology - Knowledge and Information, grade: -, -, language: English, abstract: This is a book about embodiment -- the idea that intelligence requires a body -- and how having a body shapes the way we think. The idea that the body is required for intelligence has been around since nearly three decades ago, but an awful lot has changed since then. Research labs and leading technology companies around the world have produced a host of sometimes science fiction-like creations: unbelievably realistic humanoids, robot musicians, wearable technology, robots controlled by biological brains, robots that can walk without a brain, real-life cyborgs, robots in homes for the elderly, robots that literally put themselves together, and artificial cells grown automatically. This new breed of technology is the direct result of the embodied approach to intelligence. Along the way, many of the initially vague ideas have been elaborated and the arguments sharpened, and are beginning to form into a coherent structure. This popular science book, aimed at a broad audience, provides a clear and up to date overview of the progress being...
